

Lightboxes

Professionally manufactured to the highest standards, CSS light boxes add an extra dimension to your project.

Applications

Residential
Commercial
Industrial

CSS light boxes are just one result of our commitment to innovation. We recognise that concrete products, while vital, are just one part of your construction process. Being able to save time later in the project – when it comes to installing lighting – increases efficiencies and helps you complete your work on time. And because these light boxes are made by CSS, you can rely on consistent dimensions and the same high-quality standards you've come to expect from our concrete blocks.

- Flexible options when it comes to fitting.
- Identical dimensions to our S120-type block for a perfect fit.
- We can deliver light boxes alongside your CSS concrete blocks.- Can also be used as speaker boxes.

Service is not our only strength.
